CRAN

The R Project for Statistical Computing

Getting Started

R is a free software environment for statistical computing and graphics. It compiles and runs on a wide variety of UNIX platforms, Windows and MacOS. To download R, please choose your preferred CRAN mirror.

If you have questions about R like how to download and install the software, or what the license terms are, please read our answers to frequently asked questions before you send an email.

News

- R version 4.0.1 (See Things Now) prerelease versions will appear starting Wednesday 2020-05-27. Final release is scheduled for Saturday 2020-06-06.
- R version 4.0.0 (Arbor Day) has been released on 2020-04-24.
- useR! 2020 in Saint Louis has been cancelled. The European hub planned in Munich will not be an in-person conference. Both organizing committees are

The Comprehensive R Archive Network

Download and Install R

Precompiled binary distributions of the base system and contributed packages, **Windows** and users most likely want one of these versions of R:

- Download R for Linux
- Download R for MacOS X
- Download R for Windows

R is part of many Linux distributions, you should check with your Linux package management in addition to the link above.

Source Code for all Platforms

Windows and Mac users most likely want to download the precompiled binaries listed in the u not the source code. The sources have to be compiled before you can use them. If you do not k what this means, you probably do not want to do it!

- The latest release (2020-04-24, Arbor Day) **R-4.0.0.tar.gz**, read what's new in the latest v
- Sources of R alpha and beta releases (daily snapshots, created only in time periods before planned release).
- Daily snapshots of current patched and development versions are available here. Please i about new features and bug fixes before filing corresponding feature requests or bug rep
