## The R Project for Statistical Computing

### Getting Started

R is a free software environment for statistical computing and graphics. It compiles and runs on a wide variety of UNIX platforms, Windows and MacOS. To **download R**, please choose your preferred CRAN mirror.

If you have questions about R like how to download and install the software, or what the license terms are, please read our **answers** to frequently asked questions before you send an email.

### News

- **R version 4.0.1 (See Things Now)** prerelease versions will appear starting Wednesday 2020-05-27. Final release is scheduled for Saturday 2020-06-06.
- **R version 4.0.0 (Arbor Day)** has been released on 2020-04-24.
- useR! 2020 in Saint Louis has been cancelled. The European hub planned in Munich will not be an in-person conference. Both organizing committees are

### The Comprehensive R Archive Network

#### Download and Install R

Precompiled binary distributions of the base system and contributed packages, **Windows and** users most likely want one of these versions of R:

- [Download R for Linux](#)
- [Download R for MacOS X](#)
- [Download R for Windows](#)

R is part of many Linux distributions, you should check with your Linux package management in addition to the link above.

#### Source Code for all Platforms

Windows and Mac users most likely want to download the precompiled binaries listed in the u not the source code. The sources have to be compiled before you can use them. If you do not k what this means, you probably do not want to do it!

- The latest release (2020-04-24, Arbor Day) [R-4.0.0.tar.gz](#), read [what's new](#) in the latest v
- Sources of [R alpha and beta releases](#) (daily snapshots, created only in time periods before planned release).
- Daily snapshots of current patched and development versions are [available here](#). Please i about [new features and bug fixes](#) before filing corresponding feature requests or bug rep

### R for Windows

#### Subdirectories:

[base](#)

[contrib](#)

[old-contrib](#)

[Rtools](#)

Binaries for base distribution. This is what you want to **install R for the first time**. Binaries of contributed CRAN packages (for R >= 2.13.x; managed by Uwe Ligges), also information on [third party software](#) available for CRAN Windows services and corresponding environment and make variables.

Binaries of contributed CRAN packages for outdated versions of R (for R < 2.13.x; m Uwe Ligges).

Tools to build R and R packages. This is what you want to build your own packages o Windows, or to build R itself.

Please do not submit binaries to CRAN. Package developers might want to contact Uwe Ligges directly in ca suggestions related to Windows binaries.

You may also want to read the [R FAQ](#) and [R for Windows FAQ](#).

Note: CRAN does some checks on these binaries for viruses, but cannot give guarantees. Use the normal pre downloaded executables.
